

# Breaking data boundaries.

## CoeXISt Cognos eXtensible Integration Suite

**CoeXISt delivers pre-built Flex and .Net components which easily integrate IBM Cognos 8 BI objects into your corporate enterprise portals, content management system, and all other possible web applications.**

CoeXISt provides the building blocks for creating a mashup between IBM Cognos 8 BI reporting objects such as lists, crosstabs, charts, prompts, etc. and all your other applications in a fast and easy way.

PRE-PACKAGED,  
TO WHOM TIME  
IS SWIFT.

# HOPE YOUR SLEEP IS RESTFUL.

## At rest using the RESTfull API

Since version 8.4.1, IBM Cognos BI provides a RESTfull API allowing you to integrate Cognos on another level. Using this API, application developers don't need the Cognos SDK anymore to customize Cognos functionality. CoeXIST offers plug and play objects that let you take off very fast when building an application that needs to incorporate these objects.
